Client: **DERSA - Desenvolvimento Rodoviário S.A.**

Start: **Nov/1990** Completion: **Jun/1995**

CAT-CREA-SP: **FL-30090**

Cost of Services: **US\$ 4,321,000.00**

Services: **Management and Supervision of Works**

PROJECT DESCRIPTION

Governador Carvalho Pinto Road, extending for 70 km, was constructed to alleviate the traffic of vehicles in the jammed Presidente Dutra Road and allow a better access to the northern coast region and resorts in Campos de Jordão region.

This is an important industrial production distribution channel in Paraíba Valley, where more than 2,000 companies are installed. The road influence area houses 70% of population and accounts for approximately 80% of the State tax collection.

DESCRIPTION OF SERVICES

Management and supervision of road works over an extension of 14 km containing 2 traffic lanes in each direction and an 11-m wide central flower bed, engineering works and three soil and rock tunnels, several cattle and vehicle crossings, junction with D. Pedro I Road, plus 2 accesses to municipal roads.

Activities performed by Maubertec are described below:

- Supervision of earthworks services, current and special engineering works, rigid and flexible pavements, road signalization, etc.;
- Technological controls of materials and services;
- Geological-geotechnical monitoring of tunnels by instrumentation;
- Topographic surveys and controls;
- Environmental supervision;
- Preparation of measurements of services and works; and
- Preparation of monthly progress reports and final report of works.
